SKILLS SUMMARY

- **Core Expertise:** Frontend-focused full-stack development building scalable React/Next.js applications, optimized UIs, and REST API integration, with hands-on backend experience in Node.js/Express
- **Languages:** TypeScript, JavaScript
- **Frontend:** React.js, TypeScript, Tailwind CSS
- **Backend:** Node.js, Express.js, MongoDB
- **CMS:** WordPress
- **Hosting services:** Netlify, Vercel, Firebase.
- **Version control system:** Git, Github
- **Tools:** Figma, Canva, Postman, Chrome DevTools

EXPERIENCE

- **Pocket app** Mumbai
Full Stack Engineer (Frontend-Leaning) January 2025 - June 2026
 - **Optimeflex (CMS Project):** Led frontend development of a full-scale CMS web application from scratch using **React.js**, with a focus on scalable component architecture and reusable UI design. Integrated and managed **140+ REST APIs** to power dynamic content rendering and seamless data flow. Implemented **Redis caching** for frequently accessed API responses, reducing server load and improving page render times. Built responsive, cross-device interfaces using multiple UI libraries across **multiple screen sizes and devices**. Collaborated with backend teams to co-design API contracts, manage **MongoDB collections**, and ensure smooth frontend-backend integration.
 - **TDS Housing Gateway:** Drove frontend development for a production-level **Next.js** web app for a UK housing platform. Implemented **Server-Side Rendering (SSR)** for CMS-driven pages to boost initial load performance and SEO. Delivered a fully responsive, cross-browser compatible experience across **3+ major browsers**, while coordinating with backend on data-fetching strategies and API structure.
 - **NHQB (WordPress Project):** Handled frontend customization and content management for a WordPress-based project. Improved UI consistency, customized themes, and ensured a cohesive layout across **multiple pages and sections**.
- **Proteus Advisors Pvt. Ltd** Remote
React Developer (Full-Time) December 2023 - January 2025
 - **Component Architecture & API Integration:** Engineered a library of reusable React components and integrated backend APIs for internal business tools reducing asset retrieval time by **50%** and improving overall development efficiency across the team. Worked with backend engineers to optimize **MongoDB queries** and structure data responses for efficient frontend consumption.
 - **Feature Development:** Refactored and enhanced a ReactJS application to improve modularity and code reusability. Delivered key features including **real-time autocomplete search** across large datasets, dynamic user profiles, and reusable modals all with clean, prop-driven component design.
 - **Figma to React:** Translated Figma designs into responsive, production-ready React components including dashboards, profile pages, and listing views maintaining visual consistency and pixel accuracy across **multiple modules**.
 - **Frontend Performance Optimization:** Implemented filtering, pagination, and infinite scrolling to handle **high-volume data** efficiently. Improved rendering performance and reduced bundle size using lazy loading and code-splitting.

PROJECTS

- **MERN - Job-Hub** Developed a comprehensive job listing platform with a modern and responsive user interface using React, Node.js, Express, and MongoDB. Enhanced user experience with features like job search, filtering by category and location, and a user-friendly dashboard for job seekers and employers.. | [Project-Code](#)
- **MERN - BLOG-web-application** Developed a visually appealing web application, "VBlog," featuring a streamlined navigation bar with sections for Home, Contact, About, and Login. Designed a content-rich Home page with sample blogs, categorized under "Popular Categories," and a 'Recent Posts' section for user engagement| [Project-Code](#)

ACHIEVEMENTS

- **Certification in React.js:** Completed on September 7, 2023.:
- **CSI Involvement:** Served as the Treasurer in the third year and Event Manager in the second year for the Computer Society of India (CSI), showcasing leadership and organizational skills in managing financial responsibilities and coordinating successful events.:

EDUCATION

- **Thakur Shyamnarayan Degree College** India
Bachelor in Computer Science ; CGPA - 8.9 July 2021 - June 2024
Courses: Operating Systems, Data Structures, Networking, Databases.
