## SUMMARY

Frontend Software Developer with 2.5+ years of experience delivering production-grade web applications using React.js and Next.js. Strong track record of building scalable, reusable component architectures, converting Figma designs into pixel-perfect responsive UIs, and improving performance across cross-browser environments.

## SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript
- **Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
- **State Management:** Redux, Redux Toolkit
- **Hosting Services:** Netlify, Vercel, Firebase
- **Performance:** Lazy Loading, Code Splitting
- **Version Control:** Git, GitHub
- **Tools:** Figma, Canva, Postman, Chrome DevTools

## EXPERIENCE

- **Pocket app** Mumbai  
*Software Engineer* January 2025 - June 2026
  - **Conservatives (UK Political Events Platform):** Built a mobile event-navigation app in React Native for a UK-based political organization, featuring **9 interactive maps across 6 floors** to help users locate **100+ events**. Implemented a favorites system allowing users to save events of interest, with time-based push notifications alerting users when a favorited event was starting. The app was downloaded by **1,000+ users**.
  - **Optimefex (CMS Project):** Built a scalable CMS-based web application, establishing a reusable component structure and modular architecture that became the foundation for future feature development. Owned the frontend integration layer, collaborating directly with backend teams to wire in dynamic data and core application functionality. Drove performance and UX improvements through efficient state management and optimized component design, leveraging GitHub Copilot and Claude to accelerate development and debugging.
  - **TDS Housing Gateway:** Contributed to building a production-level Next.js web application for a UK housing platform, leveraging server-side rendering (SSR) to develop dynamic, CMS-driven pages. Improved performance through lazy loading and code-splitting, delivering a fast, responsive experience across **3+ major browsers**.
  - **Xantura (Corporate Website):** Developed a production-ready corporate website by converting Figma designs into pixel-perfect, responsive interfaces using reusable and modular React components. Built a library of small, reusable UI components that eliminated repetitive coding across the site and significantly sped up development. Integrated REST APIs with robust loading, error, and edge-case handling, and implemented complex business logic and interactive UI features — optimizing performance, responsiveness, and cross-browser compatibility across multiple screen sizes and devices.
  - **NHQB (WordPress Project):** Worked on a WordPress-based project focusing on content management and customization. Improved UI, customized themes, and maintained consistency across **multiple pages and sections** of the website.
- **Proteus Advisors Pvt. Ltd** Remote  
*Software Developer* December 2023 - January 2025
  - **Refactored and built core business applications:** Built reusable React components and integrated backend services for internal tools, reducing asset retrieval time by **50%** and improving overall development efficiency.
  - **Feature Development and Code Contribution:** Refactored and enhanced a ReactJS application, improving code reusability. Built features such as real-time autocomplete search handling **large datasets**, along with dynamic profiles and reusable modals for faster UI development.
  - **Figma designs to React:** Converted Figma designs into responsive React components including dashboards, profiles, and listings, ensuring consistency across **multiple modules**.
  - **Performance Optimization:** Implemented filtering, pagination, and infinite scrolling to handle **high-volume data** efficiently. Improved performance using lazy loading and code-splitting for a smoother user experience.

## PROJECTS

- **MERN - Job-Hub** Developed a comprehensive job listing platform with a modern and responsive user interface using React, Node.js, Express, and MongoDB. Implemented job search, filtering by category and location, and user-friendly dashboards for job seekers and employers. | Project-Code
- **MERN - Blog Web Application** Developed a full-stack blog platform using React, Node.js, Express, and MongoDB with a responsive user interface. Implemented structured navigation, categorized content, recent posts, and user authentication features to provide an organized blogging experience. | Project-Code

## EDUCATION

- **Thakur Shyamnarayan Degree College** India  
*Bachelor of Science in Computer Science (CGPA: 8.9)* July 2019 - June 2023  
*Courses:* Operating Systems, Data Structures, Networking, Databases.
