Location: Mumbai, India

EDUCATION

- **Thakur Shyamnarayan Degree College** India
Bachelor in Computer Science ; CGPA - 8.9 July 2019 - June 2023
Courses: Operating Systems, Data Structures, Networking, Databases.

SKILLS SUMMARY

- **Core Expertise:** Large-scale React/Next.js applications, performance optimization, design systems, testing at scale, observability, and secure frontend architectures.
- **Languages:** TypeScript, JavaScript
- **Frontend:** React.js, TypeScript, Tailwind CSS
- **CMS:** WordPress
- **Hosting services:** Netlify, Vercel, Firebase.
- **Version control system:** Git, Github
- **Tools:** Figma, Canva, Postman, Chrome DevTools

EXPERIENCE

- **Pocket app** Mumbai
Software Engineer 1.5 (Full-Time) January 2025 – Present
 - **Optimefex (CMS Project):** Built a complete CMS-based web application from scratch using React, focusing on scalable architecture and reusable components. Integrated and managed **140+ APIs** to enable dynamic content rendering and smooth data flow across the application. Worked with multiple UI libraries to develop responsive and consistent interfaces across **multiple screen sizes and devices**. Collaborated closely with backend teams to align API structures and ensure seamless integration. Optimized performance and improved user experience through efficient data handling.
 - **TDS Housing Gateway:** Contributed to building a production-level Next.js web app for a UK housing platform. Developed dynamic CMS-driven pages using SSR, improving initial load performance and ensuring a responsive and cross-browser compatible experience across **3+ major browsers**.
 - **NHQB (WordPress Project):** Worked on a WordPress-based project focusing on content management and customization. Improved UI, customized themes, and maintained consistency across **multiple pages and sections** of the website.
- **Proteus Advisors Pvt. Ltd** Remote
React Developer (Full-Time) December 2023 - January 2025
 - **Refactored and built core business applications:** Built reusable React components and integrated backend APIs for internal tools, reducing asset retrieval time by **50%** and improving overall development efficiency.
 - **Feature Development and Code Contribution::** Refactored and enhanced a ReactJS application, improving code reusability. Built features like real-time autocomplete search handling **large datasets**, along with dynamic profiles and reusable modals for faster UI development.
 - **Figma designs to React:** Converted Figma designs into responsive React components including dashboards, profiles, and listings, ensuring consistency across **multiple modules**.
 - **Performance Optimization:** Implemented filtering, pagination, and infinite scrolling to handle **high-volume data** efficiently. Improved performance using lazy loading and code-splitting for a smoother user experience.

PROJECTS

- **MERN - Job-Hub** Developed a comprehensive job listing platform with a modern and responsive user interface using React, Node.js, Express, and MongoDB. Enhanced user experience with features like job search, filtering by category and location, and a user-friendly dashboard for job seekers and employers.. | Project-Code
- **MERN - BLOG-web-application** Developed a visually appealing web application, "VBlog," featuring a streamlined navigation bar with sections for Home, Contact, About, and Login. Designed a content-rich Home page with sample blogs, categorized under "Popular Categories," and a 'Recent Posts' section for user engagement| Project-Code

ACHIEVEMENTS

- **Certification in React.js:** Completed on September 7, 2023.:
- **CSI Involvement:** Served as the Treasurer in the third year and Event Manager in the second year for the Computer Society of India (CSI), showcasing leadership and organizational skills in managing financial responsibilities and coordinating successful events.:
